

INSTALLATION

OF WATERPROOFING MEMBRANE FOR SWIMMING POOL

Tools

Scissors, hook-shaped blade cutter, 2-meter steel ruler, bottle for liquid PVC, level, silicone pressure roller, inox rivet, punching machine, scribe, metal brush, hammers, triangle, mark line, pencil, hot air welding machine, 5-meter measuring tape, 50-meter measuring tape, etc.

Liquid PVC

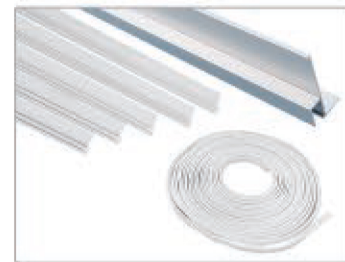

Hot air welding machine

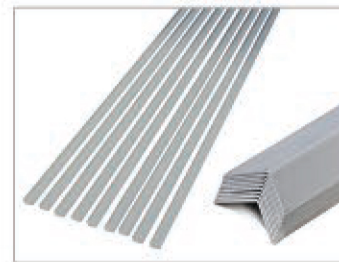

Inox rivets

Water inlet/water outlet

Welding stripe/Wedge lock /hung profile

PVC coated metal

Lane line

CONSTRUCTION PROCESS OF ADHESIVE FILM

1
Surface smoothing

2
Installation of embedded parts

3
Installation of hung profile or
PVC coated metal

4
Cutting

5
Wall laying and welding

6
Floor laying and welding

7
Liquid PVC

8
Installation of hydraulic accessories
(water inlet/outlet, lights, etc.)

9
Acceptance inspection
